Live VST E-Drumming Unlocked

Key takeaways from the Masterclass by **Luke Oswald**

Featuring Jobeky E-Drums with Superior Drummer 3 & EZdrummer 3 from Toontrack

📖 Key Concepts

> **Signal Chain:** Controller > Module/Interface > Laptop/VST > Output.

> **Latency Fix:** A 64-sample buffer size is the sweet spot (~3-5ms).

> **Gear:** RAM is key (16GB min). A dedicated laptop is a great, affordable option.

> **Pre-Show Ritual:** Reboot, kill networks/apps, and check all connections.

⚙️ Road-Tested Gear

> **E-Drums:** Custom kits like Jobeky offer an acoustic look & feel.

> **Modules:** Roland is the standard, but any with MIDI out will work.

> **Interfaces:** Pro-level PreSonus or MOTU are excellent options.
